

# JULIAN BUSTOS

## FULL STACK WEB DEVELOPER | ENTREPRENEUR

🏠 JULIANBUSTOS.DEV ✉️ JULIAN.M.BUSTOS@GMAIL.COM ☎️ (647) 783-6967 🌐 GITHUB.COM/JULIMANCAN 🔗 LINKEDIN.COM/IN/JULIAN-M-BUSTOS

### PROFILE

Web Developer with 5+ years of experience in entrepreneurship, consulting, and media production in Toronto with a knack for creating new solutions in a short period of time.

Fun, energetic, fast learner who knows that honesty, team work, and hard work are the most important elements for any project. Passionate about technology, the internet, languages and acquiring new knowledge and skills.

Actively learning Next.js, Nuxt.js, Vue.js, Docker, and much more!

Whenever I'm not coding, I'm either cuddling foster dogs (when available), out creating content with my musician partner, or out in a park playing soccer.

### PROFESSIONAL EXPERIENCE

#### Revive Superfoods

**Dates:** Aug. 2021 to Current

##### Front-end Developer

- Work in an agile environment that focuses on quality and performance, establishing a continuous delivery process.
- Switching the current website from WordPress to a Ruby on Rails web application to increase conversion and retention sales and better internal systems and communications within the company, improving the efficiency of our Distribution Centers.
- Translate UX designs into code and commit code to Git.
- Build responsive, performant, robust, reusable and maintainable UI components.

#### El Junto

**Dates:** March 2015 to Aug 2021

**Web Development, Technology Research, Technical Support, Photographer.**

##### Achievements:

- Designing and implementing websites for Carole's Cheesecakes, The Empanada Dealer, Sorrisa group (2017 - 2019), Heavenfull (2017-2019), It's My Wine, and Eunice Keitan (implementation of designer wireframe)
- Developing new business strategies to create new revenue streams, including bringing onboard new customers for Food and Wedding Photography, resulting in the growth of the Photography Business by more than 60% in 2019.
- Developing and implementing social media marketing strategies, including assisting in media production for the marketing of artist Eunice Keitan, which resulted in an increase of followers from 700 to 1600 in 2020.

#### Social Dance Spot

**Dates:** Feb 2013 - Feb 2015

##### General Manager

##### Achievements:

- Managed and maintained WordPress website and online social media to increase brand awareness in Toronto by developing new marketing strategies.
- Managed a team of 5 dance instructors while providing customer support and supervising customers' flow from first contact to maintain customers' continued engagement.

### PROJECTS

#### It's My Wine

**Dates:** Sept 2020 - Aug 2021

- Leading a team of 3 developers in the building and implementation of an e-commerce site with a label customizer aimed at creating logic and solutions in line with our client's goals, vision, and ethics.
- Designing the wireframe, peer programming the front-end of a Full Stack Application (built using React, Konva, Stripe, and emailjs), developing over 10 new features and implementing automatic emails.

**Stack:** React, Bulma, Konva, SASS, Express, Stripe.

**Link:** <https://itsmywine.netlify.app/>

**Front End Github:** <https://github.com/maple-tree-js/winery-fe>

**Back End Github:** <https://github.com/maple-tree-js/winery-be>

#### IoT MasterClass

**Dates:** April 2021 - (currently in progress)

- Building a Full Stack Application platform to connect custom IoT devices to customer's devices where they choose from a list of premade templates that display and manage the information.
- Developing the app with Vue, Nuxt, Express for the backend, and MongoDB as a database.

**Stack:** Express, Docker, MongoDB, Vue, Nuxt, Bootstrap, JWT, Element UI, MQTT, AWS (EC2 server).

**Github:** [github.com/julimancan/iot-masterclass-fe](https://github.com/julimancan/iot-masterclass-fe)

#### ReForest

**Date:** August 2020

- Worked with 3 developers as part of our graduation project for Lighthouse Labs Web Development bootcamp, to build an ecologically friendly web app for waste management.
- The app uses AWS Rekognition service to identify waste with photographs. The project was built using React, Auth0 & PostgreSQL on the backend.
- Engineered and developed the front-end features, design, and implementation of the database, which includes a gamified version to engage users by providing a space to compare their progress to their circle of friends.

**Stack:** React, Bulma, Konva, SASS, Express, Stripe, PostgreSQL, Auth0, Styled-Components.
